

GRACKLE CHECK: Catch Accessibility Bugs Faster, Cheaper, and Earlier.

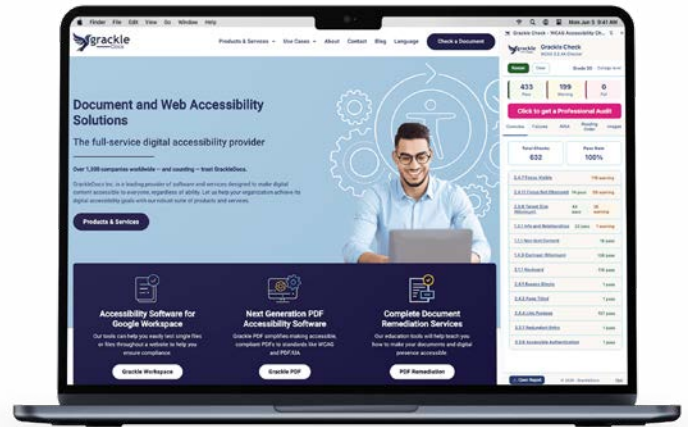

The Smarter Way to Scan

Ensuring your webpages are compliant shouldn't be a manual struggle that slows down production. **Grackle Check** is a free Chrome extension that scans any page for **WCAG 2.2 AA** issues in seconds, providing instant visual feedback during development rather than after launch. By identifying problems early, you can fix source code in minutes instead of hours, all with **zero data collection** and no setup required.

Key Features

- **Instant Visual Highlights:** Click any identified issue to see exactly where it lives on the page, allowing for **lightning-fast remediation**.
- **Integrated Source Code View:** View failure locations alongside your code to bridge the gap between testing and fixing.
- **Five Specialized Testing Views:** Access a purpose-built toolkit including **ARIA**, **Reading Order**, and **Image Alt Text** views for deep-dive auditing.
- **Professional Reporting:** Generate high-quality HTML and CSV reports to track issues in your existing QA ticketing systems.
- **Privacy-First Architecture:** Runs 100% locally in your browser; it works on **password-protected pages** and local dev servers without data ever leaving your machine.

✓ 100% Free ✓ Zero Data Collection ✓ Works Immediately

Why Choose Grackle Check?

Grackle Check removes the “complexity barrier” by offering a professional-grade tool with **no learning curve** and **no cost**. While competitors often gate advanced features or collect usage data, Grackle Check remains **completely free** and **privacy-focused**. It is the only entry-point tool backed by the full power of **GrackleDocs accessibility experts**, giving you a clear path to scale from automated scans to comprehensive manual audits.

Ready to catch issues before they hit production?

Install Grackle Check Free from the Chrome Web Store. Visit www.grackledocs.com or contact info@grackledocs.com for expert remediation guidance
