

## Make Every Word and PowerPoint Accessible Without Leaving Microsoft 365

Ensuring your Microsoft 365 files are compliant shouldn't feel like a second job. **Grackle Office** is an integrated add-in that transforms Word and PowerPoint into an **accessibility-first authoring environment**, allowing you to scan for WCAG 2.2 AA issues in real-time. Stop guessing at compliance and start fixing with a tool that **turns accessibility checklists into completed actions**.

### Key Features

- **Integrated Task Pane:** Scan for dozens of specialized WCAG criteria and follow **guided remediation steps** without ever leaving your document.
- **Real-World Screen Reader Previews:** Visualize the exact reading order used by **NVDA, JAWS, and Narrator** to ensure your content is truly inclusive.
- **AI-Placeholder Detection:** Automatically flag auto-generated "AI descriptions" to ensure your alt-text is **meaningful and human-verified**.
- **Enterprise-Grade Security:** A **SOC 2 compliant** architecture that runs entirely within your ecosystem, ensuring document content never leaves your client.
- **Multi-Locale Support:** Scale accessibility globally with full support for **English, French, Spanish, German, and Hebrew** (including RTL).

### Why Choose Grackle Office?

While Microsoft's built-in checker offers basic scans, **Grackle Office** provides significantly **deeper coverage** and the industry's only accurate screen reader preview. It allows organizations to **scale accessibility without scaling headcount**, empowering everyday creators to produce professional, compliant results in minutes. With one license covering both Word and PowerPoint across **Windows and Mac**, it is the most efficient way to maintain org-wide standards.
