

Grackle Scan

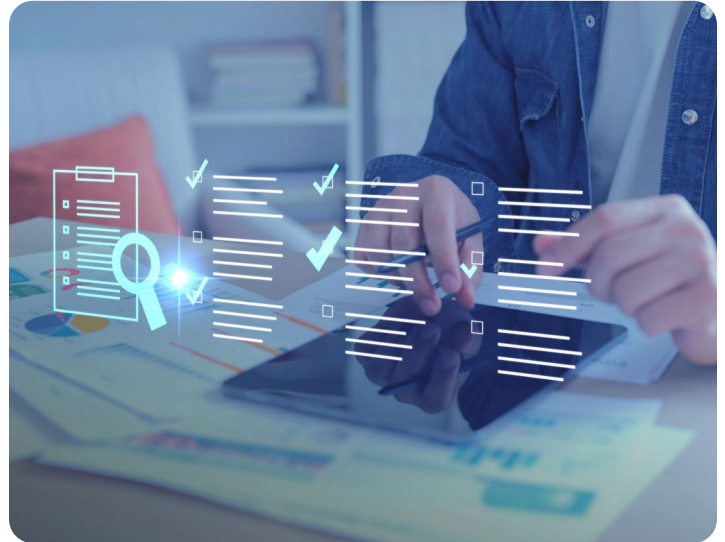

Automated Website PDF Accessibility Scanner

Keeping track of inaccessible PDFs across your public webpages can be overwhelming. **Grackle Scan** solves this by **automatically finding and checking the files** on your public websites for accessibility issues and providing detailed, easy-to-understand reports. Designed specifically for web content owners and digital accessibility teams, it continuously monitors your web properties to **catch hidden document compliance risks** before they turn into legal hurdles, saving your team time and ensuring your digital environments remain inclusive for everyone.

Key Features

- **Automatic Document Discovery:** Automatically indexes your entire public digital footprint, locating every PDF floating around your webpages, including legacy files you forgot existed.
- **Intuitive Health Dashboards:** Automatically evaluates the structure of your discovered assets, scoring them with clear, intuitive grades (like an A+) so your team knows instantly what requires attention.
- **Friendly Monthly Reporting:** Tracks how your web documents are performing month-over-month with clear progress logs, making it simple to provide compliance audit trails on request.
- **Non-Destructive File Analysis:** Securely evaluates the structure, metadata, and accessibility tags of your files without changing, altering, or breaking your original files.
- **Zero Site Disruption:** Quietly checks all of your public web resources in the background without affecting your website's speed or altering the experience for everyday visitors.

Why Choose Grackle Scan?

Grackle Scan is the automated solution that allows organizations to identify, prioritize, and **track the remediation of document accessibility barriers at scale**. Instead of waiting for an audit or an official complaint to surface, it tracks your document health continuously in the background, protecting your organization from costly litigation, brand damage, and compliance backlogs. By **gathering every untracked PDF on your site into one clear, centralized view**, it removes the guesswork from document oversight and ensures your public digital resources are welcoming to all users.

Designed by the Experts in Document Accessibility

Purely web-based. Zero system installation required.

Trusted by teams in: Government | Education | Enterprise | Healthcare | Financial Services
